

PREETHI SRINIVASAN

Summary

Enthusiastic and committed graduate with knowledge in Dot Net and Web development looking to pursue a career in the Software domain. Seeking a position in a company where I can use my skills to contribute to the growth of the company while having the scope to develop my skills.

Project

1/2023 ELECTRONIC SHOP MANAGEMENT SYSTEM

Designed Electronic Shop Management System for effective management of products and buying available products using **C#** and **ADO.NET**. Developed intuitive user interfaces for adding new products, updating existing ones, and deleting obsolete items. This window application allows admins to manage inventory efficiently, giving access to users, viewing reports and also users to view and add purchased products. Created store procedure and Used grid view for displaying data from the database. Created MDI(multiple-document interface) pages having menu with submenus for switching to another windows and respective SDI pages(single-document interface).

2/2023 CAREER CONNECT WEB PAGE

Designed and built Career Connect webpage to individuals actively searching for employment opportunities and companies looking for skilled employees using **ASP.NET**. Designed responsive career connect webpage using **HTML, CSS, and Bootstrap**. Used controls such as data grid control for displaying the data. Used master pages in the application for common designs occurring on multiple pages. SQL Connection given in web.config to store user information. Using stored procedure, retrieved and displayed matching candidates according to the skills matching with company's requirement.

1/2023 FOODERY - RESTAURANT WEB PAGE

Built webpage that helps restaurant to build their brand and let people find details about them. Used Bootstrap, HTML, CSS to build the webpages from scratch that is responsive for customers to view in all devices. Online reservation made for clients in the website. Validated the booking form using **JavaScript**. Using **PHP** connected with **MySQL** to store customer booking details from website. Automatic loading of amount according to the options selected and person count is enabled in the booking form. Using JavaScript, designed pop that shows after five seconds of visiting the page.

2/2023 MY PORTFOLIO

Created a responsive portfolio with animations, card flips while hovering and form validations using HTML, CSS, Bootstrap, PHP, MySQL.
